

What People are Saying about ULTRA ANCHOR

As the sole distributor of ULTRA-brand products in the U.S., we have some great things to say about the ULTRA ANCHOR. You may be interested to hear what others are saying about this amazingly effective and stunningly beautiful anchor.

“We have used our **ULTRA Anchor** many, many times throughout our trip and absolutely LOVE it!!! Our new motto is simply "Drop it, set it, forget it!" We can't even count how many times we watched other boats drop their anchor, drag their anchor, move to another spot, and repeat, repeat, repeat. We never even once had to move because our anchor wouldn't set. In fact, we have successfully anchored on first attempt every single time she's been dropped.”

- Alexis Sheppard & Deborah Perry, *NuMoon*, 42' Nova Sundeck, USA

“The combination of the **ULTRA Anchor**, your nifty swivel and your chain hook are in danger of making us become over-confident in our anchoring skills. Last night we had 32- knot winds from the north... no problem. An hour ago we pulled into a very windy, crowded anchorage with just enough room for us in front of a large powerboat. We were confident that there wouldn't be any slippage...again, no problems.”

- John and Nancy Celick, *La Sirena*, Offshore 54' PHMY

“We have been having problems with a dragging anchor, due primarily to the anchor itself and our inexperience. Last week we started to use your anchor, the **ULTRA Anchor**. When we give enough pay out and reverse the engine as soon as it catches the chain, the boat stops like it is nailed in place and she does not move. Anchoring is not a problem for us anymore. We congratulate ourselves with each anchoring success. We congratulate you for manufacturing such a functional and high-quality anchor.”

- Atilla Horoz, Turkey

“When our **ULTRA Anchor** finally arrived, we had a crowd come to have a look. The next morning's local VHF Net said it was the Sexiest Anchor in the Med. Personally, all I really cared about, was that it was the best holding anchor in the Med.

- Steve Dinger, S/V Tivoli—472

“We have a 46 lb. **ULTRA Anchor** mounted on our Bayliner 4087, *SeaHorse VI*. It looks like it was designed for the boat. Our first overnight anchor was in a bay in a Northerly 15-25 knot wind. We didn't move and are very happy with our purchase so far.”

- Sebastien Anderson, *SeaHorse VI*, Bayliner 4087

“I have been using your 21kg **ULTRA Anchor** for three years. This anchor is worth every penny I spent for it.”

- Cüneyt Aytaç, *Pelinay*, 10m and 9.5 ton Thrandil, Turkey
